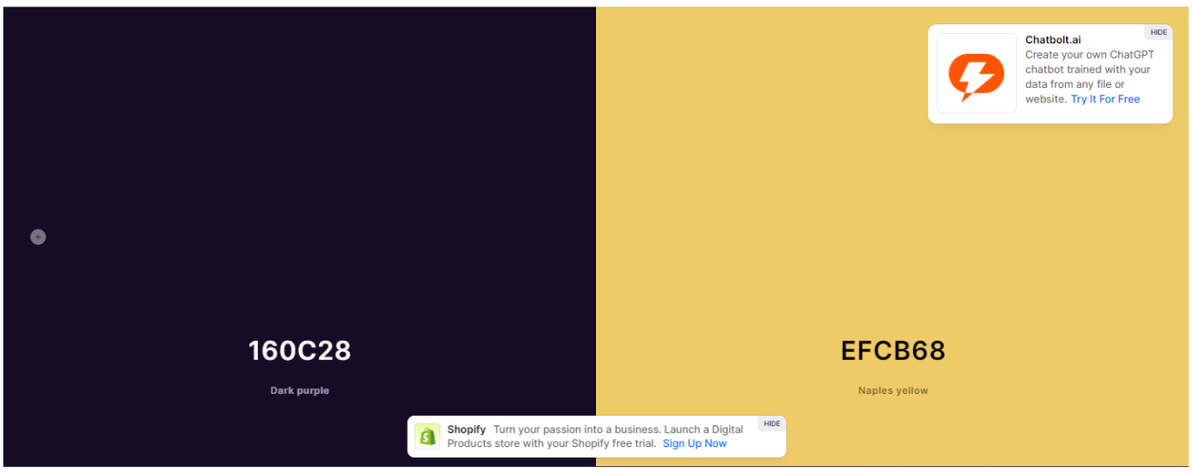
Zaldy Mar C. Ybañez 1 – BSCS – A Challenge #1: GOAL

Website Goal:

I want to create a simple webpage that is all about myself and my progression in USM as a student and as a young developer or programmer. I want to create a Website that has the colors of USM.

I want to create a non responsive website that would highlight my information and my progression here at USM. I will be learning Web Development through W3schools and other Websites. I will be using the Colors Dark purple and Naples Yellow as the color palette for my webpage.



I want the Webpage to look like the tribute website made by FreeCodeCamp but more responsive.
